DAMASCUS · SYRIA

FEASIBILITY STUDY · SEPTEMBER 2026 · FOR UNIVERSITIES, SCHOOL GROUPS, FOUNDATIONS AND DEVELOPMENT-FINANCE INSTITUTIONS

The Campus. A University on the Damascus Airport Corridor.

A 5,000-student campus around a shaded spine — four faculties, a library at the heart, 700 student beds and playing fields — 75,000 m² on 103,066 m² of single-title land, 7 km from central Damascus.

PETRA FOR REAL ESTATE INVESTMENTS · PROPERTY NO. 14 · CONCEPT VISUALISATION, NOT A PHOTOGRAPH

PETRASYRIA.COM/POSSIBILITIES/EDUCATION

A campus for a country rebuilding its institutions.

103,066 m²	5,000	75,000 m²	700	30–50 yrs
Registered area · one title · one owner	Students at maturity · four faculties	Gross floor area above ground · 3–4 storeys	Student beds · three blocks at the quiet northern end	Ground lease with renewal · Route B, recommended

The proposition. A private university — or an international school group — organised around a central spine of shade: four faculty buildings of three and four storeys on either side, a library at the heart, an auditorium, student centre and sports hall at the arrival, playing fields at the eastern edge, and 700 student beds in three blocks at the quiet northern end. Built faculty by faculty as enrolment grows; thirty years of growth on one title.

Why now. More than 3.3 million refugees and displaced Syrians have returned since December 2024, and 3.9 million registered refugees remain in the region — one of the youngest populations in the world, much of it educated abroad and expecting the same at home. The capital's universities are overstretched; private and international schools are few and small. Sanctions relief has reopened academic partnerships and finance; a branch campus of an international university is now a conversation.

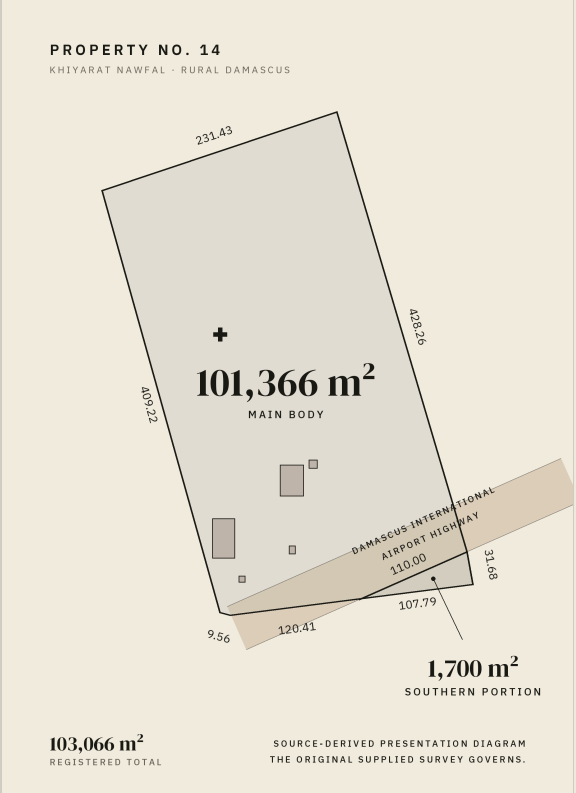

The asset. 103,066 m² registered and held in full by PETRA for Real Estate Investments: a near-rectangular main body of 101,366 m² with highway frontage, seven kilometres from the centre, ten from the airport, Jaramana's young population next door; and a 1,700 m² southern portion. Open land, one signature, the certainty a fifty-year lease requires.

Three routes. (A) An institution, foundation or endowment acquires the land and builds its own campus. (B) A 30–50-year ground lease: the institution's capital goes into faculties, not land — the route we recommend. (C) A branch-campus partnership: an international university operates, a local investor builds with development finance, PETRA contributes the land as equity or lease.

What must be verified. Ministry licensing for a private institution; permitted use; enrolment; the academic partner. This study is a basis for conversation, not an offer or investment advice.

CONCEPT VISUALISATION · NOT A PHOTOGRAPH

One registered property.
One specific geometry.

ITEM	DETAIL
Property	No. 14, Khiyarat Nawfal, Rural Damascus Governorate, Syria
Registered area	103,066 m² (10.31 ha · 25.5 acres)
Main body	101,366 m² north of the Damascus International Airport highway
Southern portion	1,700 m² across the highway, within the same property
Frontage	Damascus International Airport highway (survey line 110.00 m)
Shape	Near-rectangular: ≈ 231 m across, 409–428 m deep
Owner	PETRA for Real Estate Investments — held in full
Condition	Open land; no structures requiring relocation
Location	maps.app.goo.gl/vQzMSnBKpf5MP9EP6

Why ownership matters here

Land at this scale on the Damascus corridor is almost always held in fragments — inherited shares, co-owners, adjoining plots that must be assembled. Property No. 14 is held in full by one owner. For an institution planning in decades, that removes the single largest schedule risk in a land transaction: assembly — and a fifty-year lease rests on a title that needs no explaining.

The presentation diagram is rebuilt from the supplied cadastral survey for clarity. The original supplied survey governs; it is available in the data room together with ownership documentation.

Reachable from the whole capital.

1.2 km
Jaramana — one of the youngest, densest districts in the country

7 km
Central Damascus — the existing universities, ministries, employers

10 km
Damascus International Airport — visiting faculty, regional students

4 km
International Exhibition Centre — conferences, career fairs

Students come by bus. A campus on the airport highway is reachable from Jaramana, Sayyida Zainab and the whole south-east of the city without crossing the centre; a bus interchange at the gate makes the campus a fifteen-minute ride for a large young population. The centre and its employers are seven kilometres the other way.

International reach. Ten minutes from the airport for visiting faculty, regional students from Iraq, Jordan and the Gulf, and the diaspora families returning from abroad who will judge a campus by the standards they left.

Quiet, air and room. On open land seven kilometres out, a campus can be low-rise and shaded, with playing fields and housing — and it can grow faculty by faculty for thirty years without moving.

ROAD DISTANCE FROM PROPERTY NO. 14	APPROX. RELEVANCE TO THE CAMPUS
Jaramana — 1.2 km	Primary catchment; staff housing; student services
Sayyida Zainab · International Exhibition Centre — 4 km	Catchment; conferences and career fairs
Central Damascus — 7 km	Existing universities, hospitals for clinical training, employers
Damascus International Airport — 10 km	Visiting faculty; regional and diaspora students

Distances are stated from the property boundary, as in the supplied PETRA investment material.

PROPERTY NO. 14 · AERIAL VIEW

A generation coming home to learn.

3.3 M
Returned since Dec 2024 (UNHCR, March 2026)

3.9 M
Registered refugees in the region (Dec 2025) — largely young

US$216BN
Reconstruction estimate; education among damaged infrastructure

0
International-standard campuses on an expandable site in the capital

Demand

Syria has one of the youngest populations in the world, and a decade of displacement educated a large part of it abroad — in Turkish, Lebanese, Jordanian, Gulf and European systems. As families return they expect those standards at home. Families name schools among the conditions of return; university-age Syrians in the region are a market of hundreds of thousands. The study assumes 5,000 students at maturity.

Supply

The capital's public universities are overstretched; the private universities are small and on constrained sites; international schools are few. There is no international-standard campus in Damascus with housing, fields and room to grow.

Operators and partners

Three kinds of operator fit the site: a regional private university group; an international university opening a branch campus with a local investor — the model Gulf education cities used; and an international school group at K-12 scale (≈ 3,000 pupils on the same masterplan). Foundations and diaspora academics are natural partners; development-finance institutions and education funds back campuses in reconstruction markets.

Capital

Sanctions relief in 2025 reopened academic partnerships, accreditation and finance.

What this means for the campus

The first international-standard campus in the capital sets the reference for a country of 24 million rebuilding its universities. The institution that builds it earns a generation of graduates.

DAMASCUS

What the land would hold.

COMPONENT	INDICATIVE SCALE	NOTE
Faculty buildings A–D — teaching, laboratories, offices	45,000 m² GFA · 3–4 storeys	5,000 students at maturity; built faculty by faculty
Library and learning commons	Included · at the heart of the spine	Reading rooms, digital, study courts
Student housing	700 beds · 20,000 m² GFA	Three blocks at the quiet northern end
Auditorium, student centre, sports hall	10,000 m² GFA	At the arrival; shared with the community
Playing fields, courts, gardens	≈ 30,000 m²	Eastern edge; a pitch and courts
Parking and bus interchange	≈ 700 bays	At grade, south, by the gate
Gross floor area above ground	**≈ 75,000 m²**	**Plot ratio ≈ 0.75 · 3–4 storeys**

Specification

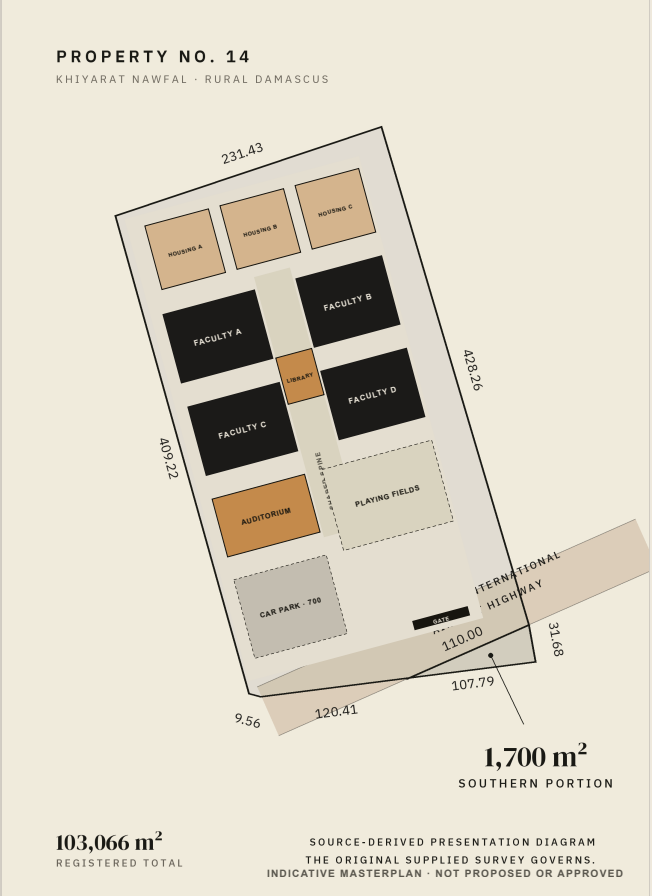

Structure	RC frames, 3–4 storeys; seismic design to code; long-span for laboratories and the auditorium
Envelope	Limestone, deep shading, arcades along the spine; no mirror glass
Teaching	Flexible lecture rooms, wet and dry laboratories, 1,200-seat auditorium, 300-seat lecture theatres
Energy	Rooftop PV on every building; battery back-up; N+1 generation for laboratories and IT
Water	Storage; on-site treatment with reuse for fields and gardens
Digital	Campus-wide fibre, dual telecom feeds, learning-management infrastructure

Phasing

PHASE	SCOPE
1	Faculties A–B, library, auditorium and student centre, spine, utilities, parking — ≈ 2,500 students
2	Faculties C–D, playing fields — to 5,000 students
3	Student housing A–C — 700 beds

Phase two follows a two-year intake; housing follows the first regional and diaspora cohorts.

Four faculties, one spine.

- **Faculty buildings A–D — 3–4 storeys**
  Either side of the spine; built as enrolment grows
- **Library · auditorium and student centre**
  Library at the heart; auditorium at the arrival
- **Student housing A–C — 700 beds**
  Quiet northern end
- **Shaded spine · playing fields**
  The walk that joins everything; a pitch and courts to the east
- **Car park and bus interchange**
  700 bays, south, by the gate
- **Southern portion — 1,700 m²**
  Signage and entrance marker, subject to access approval

Site metrics

Main body	101,366 m²
Building footprint	≈ 24,000 m²
Site coverage	≈ 24%
Spine, fields, gardens	≈ 30,000 m²
Parking and interchange	≈ 17,500 m²
Expansion reserve within the title	≈ 20,000 m²

The parcel outline is the source-derived presentation diagram of the supplied survey; the blocks are indicative and drawn for discussion. Bus-interchange access to be confirmed with the roads authority.

Three ways
this can be done.

A campus is an institution, not a rental asset. Universities are fifty-year institutions whose value is reputation and enrolment.

ROUTE A

Institution acquires and builds.

A university group, foundation or endowment buys the land and builds its own campus, faculty by faculty.

ROUTE B · RECOMMENDED

Long ground lease.

PETRA retains the land and leases it for 30–50 years to the institution that builds and operates. The institution's capital goes into faculties, not land; PETRA holds an indexed income and the reversion.

30–50 yrs
Tenure with renewal

ROUTE C

Branch campus partnership.

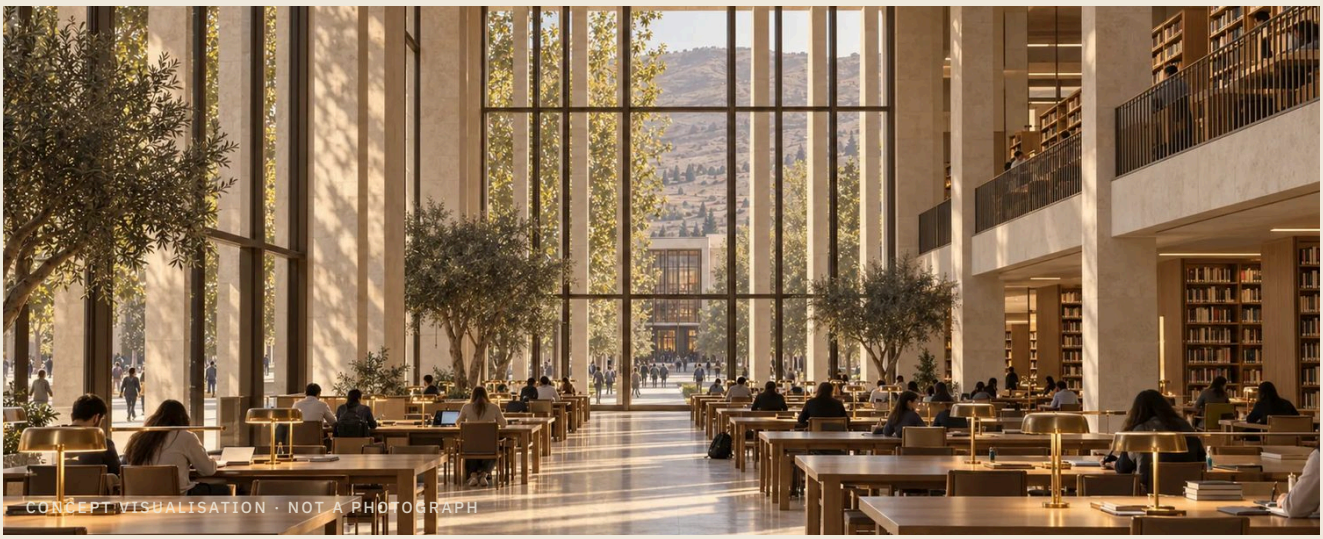

An international university opens a Damascus branch with a local investor and a development-finance institution: the investor builds, the university operates and lends its name, PETRA contributes the land as equity or lease. The model Gulf education cities used; the one lenders already know.

DFI
Concessional finance route

Land in
as equity or lease

The institution's view

What an institution weighs is whether the site can carry a campus for fifty years — it can, and no other site on the corridor can — whether tenure is certain, which one title and a long lease make it, and whether the land can be secured without starving the faculties, which Route B answers: the institution's capital goes into faculties, not land. Route C brings an accredited name and the lenders who follow it.

CONCEPT VISUALISATION · NOT A PHOTOGRAPH

What could go wrong.

RISK	MITIGANT	RATING
Ministry of Higher Education / Education licensing for a private institution	Engage the Ministry first; align programmes with national priorities; the branch-campus route brings an accredited partner	High — gating
Enrolment is untested	Phase faculty by faculty; open with high-demand programmes (engineering, medicine-adjacent, business, IT); diaspora and regional intake	High
Faculty recruitment	International partner; diaspora academics returning; on-site housing for visiting faculty	Medium
Transport for students without cars	Bus interchange at the gate; routes to Jaramana and the south-east; student housing on site	Medium — mitigable
Power and water reliability	Rooftop PV on every building, battery back-up, water storage and reuse — included	Medium — mitigable
Construction cost inflation	Phased build; lump-sum packages; laboratory equipment procured separately	Medium
Political and compliance risk; targeted sanctions remain	Counterparty screening; DFI participation; international arbitration; political-risk insurance	Medium — external
Access and bus-interchange approvals	Roads-authority consent designed in from the outset; gate set back from the highway	Medium — gating

What this study is and is not

This is a feasibility-level concept prepared by the landowner to open a conversation with universities, school groups, foundations and financiers. It is not an offer, a planning submission, an academic plan or investment advice. Independent legal, planning, academic, technical, environmental and financial review is required before any decision. Nothing in this document creates any obligation on PETRA for Real Estate Investments.

The sequence from here.

#	STEP	WHAT IT PRODUCES
01	NDA	Access to the data room
02	Data room	Title, survey, ownership documentation
03	Site visit	Walk the frontage, the access and the highway
04	Planning & access confirmation	Permitted use; highway access consent; utility capacity letters
05	Institution and Ministry requirements	Academic brief; enrolment plan; licensing; lease or partnership structure
06	Indicative terms	Route A, B or C; heads of terms
07	Design	Concept design; technical review
08	Documentation & approvals	Legal, technical, compliance; investment-authority approvals
09	Transfer / ground lease / partnership agreement	Closing

Who this is for

- Regional private university groups
- International universities considering a Damascus branch campus
- International school groups (K-12)
- Foundations, endowments and diaspora academic associations
- The Ministries of Higher Education and Education
- Development-finance institutions and education funds
